Expertise / Innovation / Performance

PRODUCTIVITY EXPERTS

About us...

- Since 1987, JAMEC has been designing, manufacturing, and installing heavy-duty handling equipment for several industrial sectors: sawmills, mines, paper mills, aluminum smelters, etc.
- Extensive experience in the design and manufacturing of heavy equipment.
- Custom mechanical engineering tailored to the needs of industries.
- JAMEC engineering team has developed expertise in 5S solutions.
- 5,000+ different projects: sawmills, mines, paper mills, aluminum smelters...

Our Offer

- Experienced mechanical engineering team (design, calculations, simulations).
- High-capacity manufacturing workshop for structures and heavy equipment.
- Installation team (turnkey, commissioning, training).
- Safety-first approach (HSE procedures, lockout/tagout, working at height, etc.)

What we deliver

- 3D design (heavy assemblies, handling, conveying, etc.).
- Structural and mechanical calculations (validation of stresses, fatigue, vibrations, etc.).
- Reengineering/modernization of existing equipment.
- Complete technical files; workshop drawings, parts lists, procedures, spare parts.

What we make

- Welded structures, frames, hoppers, skips, walkways, guardrails.
- Conveyors, chutes, transfer stations, screws/elevators, magnetization chutes.
- Workshop quality control; dimensional inspection, welds, etc.

CUSTOM-MADE SOLUTIONS

To transform and improve your organization

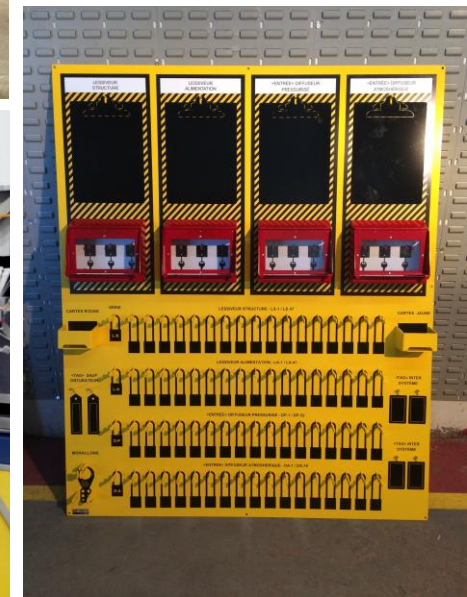

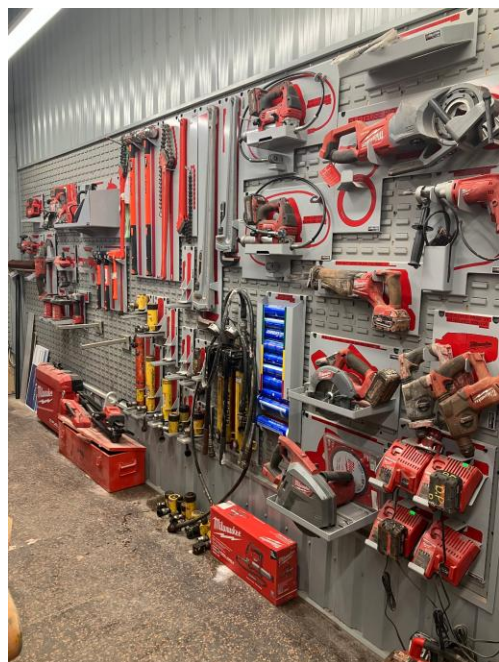

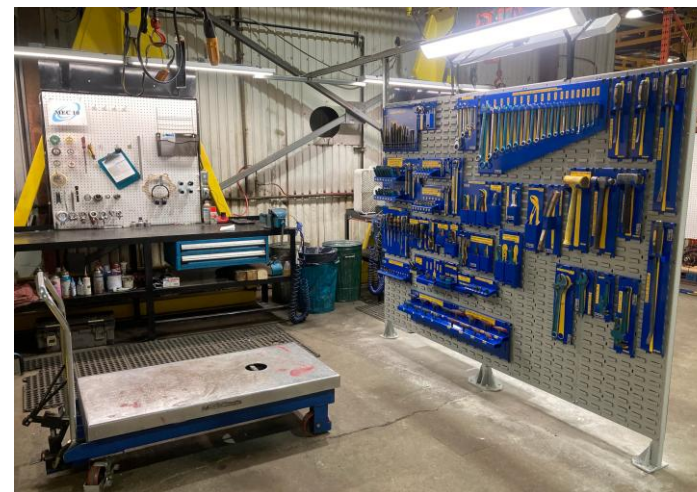

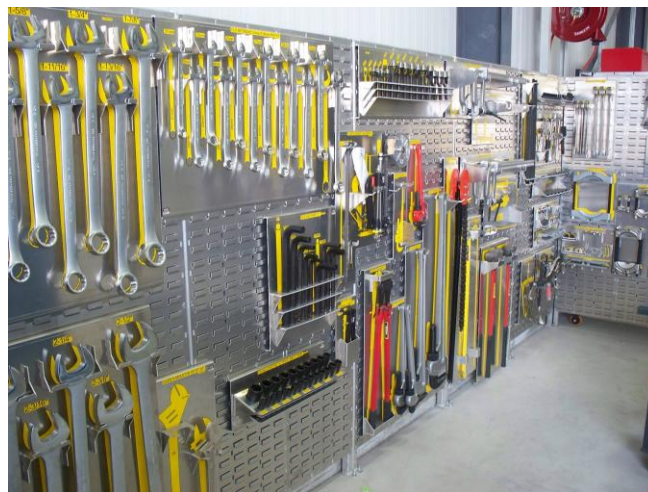

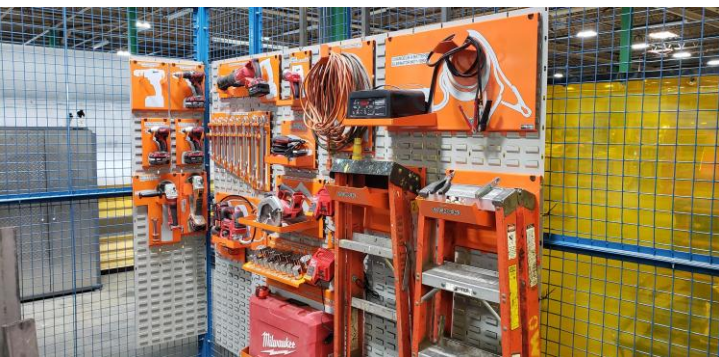

- Expert consulting service in visual management
- Cells and workstations
- Adapted vehicles, intervention vehicles, and/or maintenance vehicles
- Storage and visual inventory management
- Hanging panels (LP4)
- Customized 5S components / Turnkey

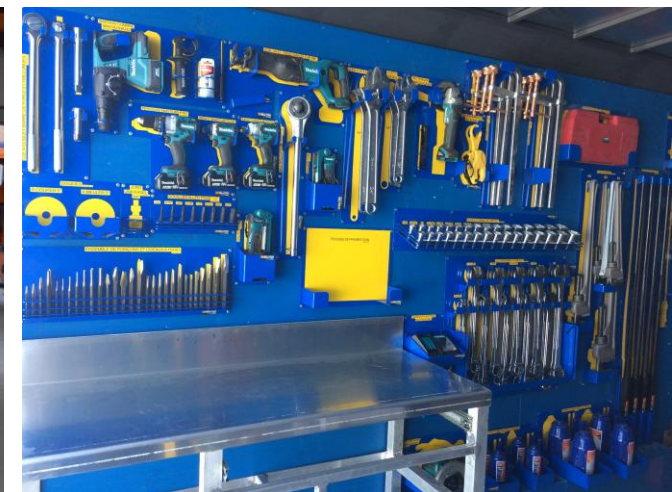

5S Solutions

Wall design Tool Room

Mobile vehicles / service trucks
